सं./No. No.011/VGL/014

दिनांक / Dated 11th February, 2011

Circular No.01/02/11

Sub: Transparency in Tendering System

There have been instances where the equipment/plant to be procured is of complex nature and the procuring organization may not possess the full knowledge of the various technical solutions available in the market to meet the desired objectives of a transparent procurement that ensures value for money spent simultaneously ensuring upgradation of technology & capacity building.

2. The Commission advises that in such procurement cases where technical specifications need to be iterated more than once, it would be prudent to invite expression of interest and proceed to finalise specifications based on technical discussions/presentations with the experienced manufacturers/suppliers in a transparent manner. In such cases, two stage tendering process may be useful and be preferred. During the first stage of tendering, acceptable technical solutions can be evaluated after calling for the Expression of Interest (EOI) from the leading experienced and knowledgeable manufacturers/suppliers in the field of the proposed procurement. The broad objectives, constraints etc. could be published while calling for EOI. On receipt of the Expressions of Interest, technical discussions/presentations may be held with the short-listed manufacturers/suppliers, who are prima facie considered technically and financially capable of supplying the material or executing the proposed work. During these technical discussions stage the procurement agency may also add those other stake holders in the discussions who could add value to the decision making on the various technical aspects and evaluation criteria. Based on the discussions/presentations so held, one or more acceptable technical solutions could be decided upon laying down detailed technical specifications for each acceptable technical solution, quality bench marks, warranty requirements, delivery milestones etc., in a manner that is consistent with the objectives of the transparent procurement. At the same time care should be taken to make the specifications generic in nature so as to provide equitable opportunities to the prospective bidders. Proper record of discussions/presentations and the process of decision making should be kept.

3. Once the technical specifications and evaluation criteria are finalized, the second stage of tendering could consist of calling for techno commercial bids as per the usual tendering system under single bid or two bid system, as per the requirement of each case. Final selection at this stage would depend upon the quoted financial bids and the evaluation matrix decided upon.
4. Commission desires that organizations formulate specific guidelines and circulate the same to all concerned before going ahead with such procurements.
