

DELHI JAL BOARD
OFFICE OF THE ADDL. CHIEF ENGINEER (M)-11
ROOM NO.102, JAL SADAN, SHIV MANDIR MARG,
LAJPAT NAGAR, NEW DELHI-110024
Email : ace.m11.djb@gmail.com Ph-011-29810956

Subject:- Timings of water supply in the area under jurisdiction of ACE(M)-11.

S.No.	Name Constituency	Name of colony	Time of Supply		Remarks
			Morning	Evening	
1	Chhattarpur AC- 46	Maidangarhi, Rajpur, Satbari, Chandanhulla, Fatehpur Beri, Asola, Dera, Bhatti, & part of Chhattarpur	5:00am to 8:30am		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
2		Remaining part of Chhattarpur, Sultanpur, Manglapuri, Ghitorni, Aya Nagar, Gadaipur, Jaunapur and Mandi	5:00am to 8:30am		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
3	Deoli AC- 47	Dakshinपुरi Extn. Block-1 to 20 except Block No.18 Shahid Camp, Sanjay Camp, Mini Subash Camp & Madangir Village	11.00 PM to 8.00 AM	10.00 AM to 9.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
4		Devli Village	7.00 AM to 9.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
5		Block No. 20 Gali No. 1 to 5 Dakshinपुरi Extn.	4.40 AM to 6.25 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

6		Madangir Village	6.30 AM to 8.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
7		A,B,G-Block Tigri and Tigri Village	4.00 AM to 6.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
8		DDA flats Tigri and JJC Tigri	5.00 AM to 6.30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
9		C-Block Tigri	5.00 AM to 5.30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
10	Dr. Ambedkar Nagar AC- 48	Block A-1st (partially) B-1st Madangir		4 Pm to 7 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
11		Block G-1 st and H-1 st Madangir	6 AM to 6:45 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
12		Block H-1 st and BG block Madangir, G-1st (Partially)	11: Am to 12: Pm		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

13	DDA flats gali no. 20 to 30 Madangir		5 Pm to 6 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
14	DDA flats Gali no 1 to 19 Madangir		6 Pm to 7 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
15	Block D- IInd(Partially) , E- IInd (partially) , F- IInd (partially) , Block C-IInd(Partially) and F-IInd (one gali), J- 2nd	5 AM to 5:45 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
16	D-II nd (Partially), G-IInd		1 Pm to 2 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
17	Block A- IInd , B-IInd , C-IInd(Partially) L- IInd(Partially)		5 Pm to 6 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
18	(Partially) Block F- II nd ,Block A- IInd , B-IInd , C-IInd L- IInd	5 AM to 6 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
19	Block F-1 st , G-1 st and h- 1 st Madangir	6: AM to 6:45 AM	6: PM to 6:45 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

20	(Partially) C-1 st , D- 2 nd Madangir(Partially)		3 Pm to 3:30 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
21	(Partially) B-1 st , C- 1 st and Central market Madangir		5 Pm to 5:40 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
22	Block J- IInd Madangir	5 AM to 5 :45 Am		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
23	Block G- IInd and H- IInd Madangir		5 Pm to 6 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
24	RPS & LIG Flats Madangir		6 PM to 7 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
25	DDA flats gali no 31-42 Madangir		6 PM to 7 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
26	Block A,B,C,D , JJR Khanpur	5 AM to 5:45 AM	5 PM to 5:45 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

27	Khanpur Village	5 AM to 6 AM	5 PM to 6 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
28	Block J,K,L , block no. 18 Dakshinpuri	11 AM to 1:45 Pm		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
29	Block – A, B,C Virat camp, Virat market Dakshinpuri	4 AM to 6 AM	3:30 Pm to 5 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
30	Block D,E,F G,H , F block market, Dakshinpuri	4 AM to 6 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
31	(Partially) Block A,B,C Dakshinpuri		5 Pm to 7 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
32	(Partially) Block A, B,C Dakshinpuri	4 Am to 6 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
33	Khanpur extension, Shiv park Krishna park, Bihari park, Raju park , Jawahar park and Duggal colony, Khanpur village , Duggal housing complex.	3:00 Am to 7:00 Am		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

34	Sangam Vihar AC- 49	Block BF, D-1st (Partialy), E-1st and O 1st		7 Pm to 8 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
35		Block D-1st (Partially) and CPO		3 Pm to 3:30 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
36		Block I 2nd and K- 2nd		5 Pm to 7 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
37		(Partially) Block A, B & C Dakshinpuri	4 AM to 6 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
38		Gali No. 1 to 28 Tughlakabad Extension	3.00 Am to 11.00 Am	5.00 Pm to 10.00 Pm	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
39		Gali No. 29 to 37 Tughlakabad Extension	3.00 AM to 9.00 AM	5.00 PM to 9.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
40		Gali No. 8 to 17 Tughlakabad Extension	3.00 AM to 7.00 AM	4.00 PM to 6.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

41	Tughlakabad AC-52	TA Block Tughlakabad Extension	5.00 AM to 9.30 AM	4.00 PM to 6.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
42		D,E,F,F-II,G-12,H-16,I,I-II,J-1st, J-III, K-19, K-1st/18 Sangam Vihar U/A Colony	3.00 AM to 7.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
43		R, T-Block Pul Pehladpur & DDA Flats Humdard.	5:00 AM to 11:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
44		A,B,C & RZ Block Pul Pehladpur	6:30 AM to 9:30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
45		HR-Block, Pul Pehladpur	7:00 AM to 9:30AM	5:00PM to 9:00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
46		Janta, LIG, MIG, Pul Pehladpur	6:30 AM to 9:30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
47		Panchmukhi Mandir, Lal Kuan	7:00 AM to 9:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

48	Chungi No.2, Lal Kuan	6:30 AM to 10:30 AM	6:00 PM to 7:00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
49	South end Apartment, Pul Pehladpur	6:30 AM to 7.30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
50	Bhangar Mohalla, & Jalim Mohalla Tughlakabad village	3.00 AM to 6.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
51	Sardar Mohalla, & Jatav Moh., Tughlakabad village	3.00 PM to 6.00 PM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
52	DDA Pkt, Kalkaji Extn. A-10,11,12,13,14	6.15 AM to 7.15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
53	DDA Pkt, Kalkaji Extn. A-8	6:00 AM to 6:40 AM	6:00 PM to 7:00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
54	Okhla Industrial Area Phase-I		4.00 PM to 5.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

55		Okhla Industrial Area Phase-II		4.00 PM to 5.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
56		Harkesh Nagar, A, B ,C & D-block	4:00 AM to 7:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
57		Harkesh Nagar, G & H-block	6:00 AM to 9:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
58		Harkesh Nagar, I,F,D & E, Block	8:00 AM to 10:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
59		Tekhand Village	6:30 AM to 10:30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
60	Badarpur AC-53	DDA, LIG Flats Badarpur,	5:15 AM to 5:45 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
61		DDA, Janta Flats Badarpur,	5:50 AM to 7:15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

62	Badarpur village	5:30 AM to 7:15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
63	Tajpur Pahari,	6:00 AM to 7:15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
64	ABC block , Budh Vihar	4:30 AM to 7:15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
65	D Block, Budh Vihar	5:30 AM to 7:15 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
66	G Block, Mohanbaba Nagar	4:30 AM to 5:30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
67	ABC-Block, Mohanbaba Nagar	5:30 AM to 7:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
68	D-E Block, Mohanbaba Nagar	6:00 AM to 7:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

69	Badarpur Extn. and F-Block Mohanbaba Nagar	5:00 AM to 7:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
70	ABC Block Molarband Extn.	4.30 AM to 6:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
71	Molarband Extn	5:00 AM to 7:00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
72	Molarband village	6.00 AM to 7.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
73	Tajpur village	4.30 AM to 6.00 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
74	Meethapur Extn. Part-III, Lakhpat Colony Part-I, Prince colony, Shakti Vihar	Water supply is distributed through diff. pockets. Each portion gets water for 30 min. to 40 min. in Evening between 12:30 PM to 4.00 PM (alternate days) 7:30 PM to 9:30 PM on Sunday and Wednesday		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
75	Sai Nagar, A-block Sindhu Farm Road, Manbhari Kunj, Gagan Vihar.	Water supply is distributed through diff. pockets. Each portion gets water for 30 min. to 40 min. in Evening between 12:30 PM to 4.00 PM (alternate days) 7:30 PM to 9:30 PM on Sunday and Wednesday		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

76		I, H (partly) & R-block, Saurabh Vihar, ABCDF & E-1, block Jaitpur Extn, Jaitpur village & Hari Nagar village.		12:30 PM to 2:30 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
77	Okhla AC-54	Kalindi Colony	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
78		Pilanjhi RSC	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
79		Taimoor Nagar village	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
80		Taimoor Nagar DDA Flats	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
81		Khizerabad village	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
82		New Friends colony A, B and C Block	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

MashihGarh village	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Batla House	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Zakir Nagar	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Jogabai	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Okhla village	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Gaffoor Nagar	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
Noor Nagar	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.

90	Tail end of Noor Nagar Extn. I & II	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
91	Gaffer Manzil	3.00 AM to 7.00 AM	5.00 PM to 7.00 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
92	Sarita Vihar Pkt. A, D, E, F, G,H, J,K &L, Sarita Vihar Pkt. B & C, Tail end of Sarita Vihar Pkt. B & C	5.00 AM to 8.30 AM	5.00 PM to 6:30 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
93	Sarita Vihar Pkt. M & N	5.00 AM to 8.30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
94	Ali Village	5.00 AM to 8.30 AM		Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
95	Madanpur Khadar	5.00 AM to 8.00 AM	5.00 PM to 6:30 PM	Given time of supply in previous column is pumping timing of water supply from the respective UGR/BPS in normal situations. This may vary in case of break down/shutdown etc. Availability of water supply to an individual house may be different, that depends on the location of the particular house with respect to the distance from the UGR/BPS, and also many other factors i.e. availability of water supply in compare to the water demand of the area etc.
