INSTRUCTIONAL ORDER

The visitors especially students often visit STPs with the prior approval of the competent authority. The visitors generally walk on walkways at each component of the plant. There are very chances of accidents during the visit by the crowd of visitors by falling into the clarifiers or aeration tank which are very deep.

To prevent such accidents, all the Plant Managers are, therefore, instructed to explain about STP and treatment process on working model in the Conference Hall to avoid such accidents. If at all required, the concerned officers not below the rank of Assistant Engineer will accompany with the visitors during visit in a group not more than 10 visitors. All the safety gadgets should be available at such crucial points of STP.
