

**DELHI JAL BOARD**  
**OFFICE OF THE CHIEF ENGINEER (WATER) PROJECT**

No. F(5) DIB/C E(W) Proj/2014/276

Dated: 02.04.2014

7/04/14

**CIRCULAR**

In a meeting while discussing a proposal of empanelment of a pipe manufacturer M/s SKS Spiral Pipes dealing with fabrication of spirally welded MS pipe with internal cement mortar lining and anti corrosive protective quoting outside, it was decided by the committee that for sourcing of the pipes, the Chief Engineer concerned is competent to accord the necessary permission after ascertaining the merits based on the criteria's such as production capacity, required certification obtained by the firm as per ISO, plant, machineries, testing facility, automation facility for moulding & welding and providing lining & quoting to meet the defined standards of the product as per codal provisions. It is further suggested that financial capacity / annual turn-over and past performance record shall also be kept in view while qualifying such firms / manufacturers for supplying the material as per the scope of work.

After inspecting the manufacture's unit of M/s SKS Spiral Pipes, it is found that the unit meets the above mentioned criteria and is considered competent to supply the MS pipes with internal cement mortar lining and anti corrosive protective quoting outside. This is for information of all concerned.
