INSTRUCTIONAL ORDERS

It has been observed that the new departmental SS Tankers recently inducted in all the maintenance divisions for supplementing water supply in water deficit areas are not being utilized properly and efficiently. The number of trips in one shift is hardly performed 2 to 3 in comparison to 6-7 trips by the private tankers which is a serious lapse on the part of the drivers and the supervisors. It is also observed that drivers are deputed in the control room for performing other duties due to shortage of shift In charge. All the concerned officials are therefore directed:

1. To ensure minimum 6 trips in a shift by all the departmental water tankers.
2. No driver will be utilized for the duty in the control room other than driving of the water tankers.
3. In case shortage of drivers, the beldars having heavy license can be utilized for driving the water tankers as per the terms and conditions already circulated by the administration.

Noncompliance of the above instructions shall be viewed seriously.
