Vulnerable Water Deficit Areas						
Name of Colony	Remedial Action	New Water Line / Inter Connection proposed	New Tube Well to be commissioned	Rationalization of water by Valve Regulation	New UGR Commissioned/ to be commissioned since summer 2025	Timeline
Rajpur khurd Extension,	The water demand of these colonies is met out mostly through bore wells. However, yield of these tubewells is less and are not able to cater to the water demand of the area on a reliable basis. Also, quality of water of these tubewells is not upto the required standards. In summer seasons, a lot of complaints regarding failure of tubewells in terms of decreased water strata and electrical system malfunctions occur making the water supply systems in the area very unreliable.	07 numbers of new tubewells have been proposed to be installed and commissioned by March 2026, out of which 03 have already been installed and commissioned. Where networks are not existing, additional pipelines have been proposed to connect the newly installed tubewells upto existing supply network.	At least 07 tubewells are to be installed and commissioned by 30.04.26	This system is already in practice to rationalize the existing available water to cover optimum population through piped networks.	An unused booster (UGR) at Satbari near Old CNG Pump Rajpur Khurd has already been proposed to be commissioned and restarted by March-April 2026.	25.03.2026
Kharak Rewara	Most of the area of these colonies is on forest land and DJB cannot lay water lines. The water demand of these colonies is met out through bore wells and tankers. As, at these places water is not encountered at sufficient quantity and pressure during efforts for bore wells, therefore, the area is mostly catered through tanker supply. To meet the immediate water needs, number of tanker trips in the area will be increased in the upcoming summers.	NA	01 tubewell is to be installed and commissioned by 30.04.26	As per local residents agreement	No	31.03.2026

Sainik Colony, Asola	This is an entirely newly developed and rapidly expanding colony. However, a tubewell has been installed and another to be installed and commissioned by 25.03.2026. The installed tubewell has sufficient yield of water and if the second one is also successfully installed, the area could be freed from tanker supply by 31.03.2026 with its existing population.	Yes. New water networks to be laid in the entire colony.	01 tubewell is to be installed and 02 to be commissioned by 30.04.26	As per local residents agreement	No	31.03.2026
Bapu & Shambhav Camps; Shanti Camp; Bhim Basti; and Jawahar Camps Mandi	These areas are totally dependent on tankers. Although a few tubewells have been installed and commissioned through temporary piped networks, the same are not very effective due to severely less yield of these tubewells. Also, most of the portions of the area are under dispute with Forest Department and hence other development works could not be carried out.	One tubewell to be commissioned in Bhim Basti and one in Jawahar Camp and pipelines for the same are to be laid	One tubewell to be commissioned in Bhim Basti and one in Jawahar Camp by 30.04.26	Yes, as per local residents agreement	No	31.03.2026
Dera and Mandi Villages	There is filtered water supply in few portions of Dera and Mandi Villages. However, due to increased number of connections at head ends, the tail ends are now entirely devoid of water. To augment the water requirements, 04 numbers of tubewells were proposed in Dera Village, out of which 03 have been successfully installed and one failed to yield water. Also, 02 numbers of tubewells have been installed and commissioned in Mandi Village and one yet to be installed.	Yes, to commission the tubewells and cover the newly developed colonies with water networks.	02 in Mandi Village have been commissioned and 03 in Dera Village area to be commissioned.	Yes, as per local residents agreement	No	25.03.2026
Aya Nagar Village and Extension, Ghitorni Village	The filtered water which earlier used to cater to few portions of Aya Nagar Village is not reaching now. Hence, the entire area is dependent on tankers and tubewells only. 15 numbers of tubewells have been proposed to be installed in various portions of Aya Nagar ward. Many have been installed and the rest will be installed and commissioned by 31.03.2026.	Yes, to commission the tubewells and cover the newly developed colonies with water networks.	15 have been installed and commissioned. The rest would be commissioned by 30.04.2026.	Yes, as per local residents agreement	No	30.04.2026

CHHATARPUR (MNWS PPP) AREA:-

Vulnerable Water Deficit Areas
